Phase I Environmental Site Assessment Report
N. Bergin Lane Improvement Project
N. Bergin Lane
Farmington, San Juan County, New Mexico

Executive Summary

Animas Environmental Services, LLC is pleased to provide the results of a Phase I Environmental Site Assessment to the City of Bloomfield for the right of way of North Bergin Lane, between US 64 and West Blanco Blvd., Bloomfield, New Mexico. This Environmental Site Assessment was performed on behalf of the City of Bloomfield as part of due diligence associated with assessment of the project area and the possible acquisition of land by the city in order to complete the project. The City of Bloomfield anticipates that project funding will be administered through the New Mexico Department of Transportation.

As part of this Phase I Environmental Site Assessment, Animas Environmental Services completed: 1) reconnaissance of the project area; 2) regulatory agency file search and records review; 3) review of available site historical data; 4) a description of the site hydrologic, geologic, and topographic features; and 5) conclusions that summarize the significant site findings.

An evaluation of data concerning the project area was performed to identify Recognized Environmental Conditions in accordance with the U.S. Environmental Protection Agency's All Appropriate Inquiry regulations (40 Code of Federal Regulations Part 312) and American Society for Testing and Materials International Standard Practice E1527-21 guidelines. The New Mexico Department of Transportation's Hazardous Material Investigation Handbook dated 2021 was also followed as part of the project.

In completing the Environmental Site Assessment, Animas Environmental Services identified **13 findings** at the project area and nearby properties within the minimum search distance specified by the American Society for Testing and Materials. Of the findings identified, it was concluded there are **No Recognized Environmental Conditions** associated with the project area.

This page intentionally left blank.

1.0 Introduction

Animas Environmental Services, LLC (AES) has completed a Phase I Environmental Site Assessment (ESA), on behalf of the City of Bloomfield as part of the environmental due diligence process for a pending street improvement project at N. Bergin Lane. The project includes improvements, as well as possible acquisition of additional right-of-way (ROW), by the City of Bloomfield in Bloomfield, San Juan County, New Mexico. The project area includes Bloomfield ROW within Bergin Lane and is adjacent to 23 parcels. A Topographic Site Location Map and Aerial Site Vicinity Map of the project area are presented as Figures 1 and 2, respectively.

The project area is legally described as being located between the east and west half of NW¼ Section 21 Township 29 North, Range 11 West New Mexico Principal Meridian, Bloomfield, San Juan County, New Mexico.

The project scope and design components include roadway reconstruction of north and south bound lanes, widening and paving the roadway, adding curbs, installing aprons at intersections, adding sidewalks along the west side of the roadway and a new storm sewer system which will tie into the existing system that runs along US 64. The project along N. Bergin Lane is approximately 0.5 miles in length, and the project width will vary between approximately 38 to 45 feet. According to plans for the project, the potential maximum disturbed soil depth is 1 ft in depth. The production date is undetermined, as additional engineering designs are still required before final planning for the project is complete (Evans, Lee, 2024). Project funding will be administered through New Mexico Department of Transportation (NMDOT), and it is anticipated that this Phase I ESA will satisfy the NMDOT requirement for an Initial Site Assessment (ISA) Determination.

The findings, opinions and conclusions of this ESA are based upon an evaluation of data collected through the review of readily available records, a site reconnaissance, and completion of limited personal interviews. The American Society for Testing and Materials (ASTM) International standard practices E1527-21 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" was used as the primary guideline for conducting this ESA investigation. Italicized words in this report are used as defined in Section 3 of ASTM E1527 -21.

1.1 Purpose

The purpose of this ESA is to document reasonably identifiable "*recognized environmental conditions*" (*RECs*) associated with the project area. An ESA is typically conducted for the

purposes of a real estate transaction to evaluate the environmental status of a property with respect to hazardous materials, under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), and petroleum products. ASTM International standard practice E1527-21 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" is designed to permit a *User* to satisfy the requirements to qualify for at least one of *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* protections from CERCLA liability through the process of *All Appropriate Inquiry* (AAI) promulgated in the U.S. Environmental Protection Agency's (USEPA's) AAI regulations (40 Code of Federal Regulations [CFR] Part 312). The NMDOT Hazardous Material Investigation Handbook dated September 2021 was also followed as part of the Phase I ESA process.

1.2 Detailed Scope of Services

The ESA was conducted as part of an agreement between the City of Bloomfield and AES and was intended to follow the industry accepted ASTM Standard E1527-21 and the NMDOT Hazardous Material Investigation Handbook (NMDOT, September 2021).

1.3 Project Scope

The ESA was completed in accordance with the ASTM Standard E1527-21 and NMDOT Hazardous Material Investigation Handbook (NMDOT, September 2021). Note that a full chain of title records was not reviewed as part of the project. No building material surveys were completed as part of the project. Based on the current anticipated project scope, City of Bloomfield does not anticipate that earth disturbance will extend beyond 1 to 2 ft below grade.

1.4 Significant Assumptions

AES made no significant assumptions while completing this ESA. General assumptions associated with conducting environmental site assessments of property, which also apply to this assessment, include the assumptions that: 1) uncertainty cannot be entirely eliminated regarding the potential for *RECs*, and 2) that all appropriate inquiry does not mean an exhaustive assessment of the property, due to the limits of time or cost. General assumptions are presented in Section 4.0 of ASTM E1527-21. Assumptions made by AES that apply to specific aspects of this investigation and report are stated in the applicable sections of the report for which the assumptions were made.

1.5 Limitations and Exceptions

This ESA is based on information obtained through inquiry into reasonably ascertainable and practically reviewable standard resources. AES did not make any determination as to

whether other legal requirements in addition to the AAI requirement for the CERCLA Landowner Liability Protections are met for the project area.

This report was prepared for the benefit of the City of Bloomfield (*User)* and NMDOT in evaluating potential environmental risks associated with the proposed project. The scope of this ESA follows the industry accepted ASTM Standard 1527-21 and does not address regulatory compliance, lead-based paint, ecological resources, wetlands, endangered species, health and safety issues, industrial hygiene, and cultural or historical resources. Similar concerns, including radon, lead in drinking water, indoor air quality, biological agents, mold, and controlled substances, are also not included in this ESA. In order to qualify for any of the CERCLA landowner liability protections established under 40 CFR Part 312, a *User* must conduct all appropriate inquiries into past uses and ownership of a property being evaluated. Note that AES attempted to identify the possible presence of buried utilities that may contain asbestos containing material (ACM) or coatings. If ACM is encountered during the project's earth disturbing activities, it may result in schedule disruptions and/or additional costs for testing and mitigation.

This report reflects various sources of information gathered and readily available to AES during the completion of the ESA. Observations made during the site visits only pertain to the actual date of the site visits, which occurred on December 28, 2023, and January 31, 2024. This report does not purport to be fully representative of all site conditions or events.

The information presented in this report is limited to the clearly defined locations within the project area only, or as agreed upon in the scope of work. Should project scope or conditions change, the information, conclusions, and recommendations contained herein may no longer be valid. This report is intended to be used in its entirety. No excerpts should be extracted and considered representative of the findings of this investigation.

1.6 Special Terms and Conditions

There were no special terms stipulated for the completion of this ESA.

1.7 User Reliance

AES has completed this assessment and report for use by the City of Bloomfield as the original *User* of this ESA, and any of their subsidiaries and affiliates. This ESA report is valid for a period of 180 days after the report date. If the report is used more than 180 days after completion, but before one year has elapsed, the following components must be updated to ensure continued validity of the report for another 180 days:

- Interviews;
- Searches for recorded environmental cleanup liens;
- Reviews of federal, state, and local government records;
- Visual inspections of the project area and adjoining properties; and
- Declaration by the Environmental Professional responsible for the assessment or update.

No portion of this ESA is valid after a period of one year from the report date.

2.0 Project Area Description

This section of the ESA report provides basic information to describe the location, setting, and current property uses within and adjacent to the project area.

2.1 Project Area Location

The project area consists of the N. Bergin Lane ROW from US 64 north to W. Blanco Blvd, located along the boundary between the east and west half of NW¼ Section 21, Township 29 North, Range 11 West New Mexico Principal Meridian, Bloomfield, San Juan County, New Mexico. The N. Bergin Lane ROW abuts 23 parcels identified by the San Juan County Assessor's Office. The project area is within City limits.

2.2 Site and Vicinity General Characteristics

The project area is located on the west side of Bloomfield and lies entirely north of US 64. The San Juan River is located approximately 0.85 miles due south of the project area. The project area is surrounded by residential, business, school, and agricultural properties. The topography of the site slopes gently to the southwest. A Photographic Log with photographs taken during the site visits on December 28, 2023, and January 31, 2024, is included in Appendix A.

2.2.1 Topography

According to a review of topographic maps, observations made during the site visit, and the Environmental Data Resources, Inc. (EDR) Geocheck® - Physical Setting Source Addendum, the general topographic gradient is to the southwest, and the average elevation is approximately 5,485 feet above mean sea level (amsl) (U.S. Geological Survey, 1960) (USGS, 1965) (USGS, 1979) (USGS, 1985) (USGS, 2013) (USGS, 2020) (USGS, 2020). A

Topographic Site Location Map (2020) is included as Figure 1, and the EDR Report is presented in Appendix B.

2.2.2 Soil Information

U.S. Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Soil Survey Geographic Database (SSURGO) data were reviewed (NRCS, 1980). Soils located within the project area include:

- *Sv*— Stumble sandy clay loam, gently sloping; *A - 0 to 7 inches:* sandy clay loam
- *C - 7 to 60 inches:* loamy sand
- Fs— Fruitland sandy loam, 2 to 5 percent slopes; *A - 0 to 6 inches:* sandy loam
- *C - 6 to 60 inches:* sandy loam
- Fw— Fruitland loam, 5 to 8 percent slopes; *A - 0 to 3 inches:* loam
- *C - 3 to 60 inches:* fine sandy loam
- Ha— Haplargids-Blackston-Torriorthents complex, very steep; *A - 0 to 7 inches:* cobbly sandy loam *Bt1 - 7 to 26 inches:* cobbly sandy clay loam
    - *Bt2 - 26 to 60 inches:* cobbly sandy clay loam
- Sw— Stumble-Fruitland association, gently sloping; *A - 0 to 6 inches:* loamy sand
    - *C1 - 6 to 29 inches:* loamy sand *C2 - 29 to 60 inches:* gravelly loamy sand
    - *C3 - 60 to 64 inches:* loamy sand
- Ft— Fruitland sandy loam, wet, 0 to 2 percent slopes; *A - 0 to 6 inches:* sandy loam *C - 6 to 60 inches:* sandy loam

A soil survey map is included is included in Appendix B.

2.2.3 Geology

The project area lies within the Colorado Plateau physiographic province. The Colorado Plateau covers approximately 160,000 square miles and extends across the Four Corners area into western Colorado, eastern Utah, northeast Arizona and northwest New Mexico. The Colorado Plateau is a tectonically uplifted region composed largely of relatively undeformed sedimentary rocks and dotted with igneous structures such as laccoliths, such as the La Sal Mountains near Moab, Utah, and extrusive volcanics, like the cinder cones and lava flows in northern Arizona. Sedimentary rocks on the Plateau, which unconformably overlie Precambrian crystalline basement rocks, range in age from Lower Paleozoic to Quaternary alluvial and fluvial deposits, and they represent a vast period of marine transgression and regression. Marine transgression during the Permian deposited the San Andres Limestone and Glorieta Sandstone, the principal aquifer in the area. Generally, structure is controlled by reactivated Precambrian faults with northeast-southwest and northwest-southeast trends, which propagate to the surface as broad monoclinal folds and normal, or extensional, faults (Buss, 1960), (Peterson, 1989), (Randles, Stuart, & Richards, 2012), (Stevenson & Wray, 2009).

The EDR Report includes geological references for the project area:

- Cenozoic Era, Tertiary System, Paleocene Series (Code: Txc); Continental Deposits

2.2.4 Hydrology

The project area is located within the San Juan River watershed. Based on EDR records reported for registered water wells within 0.5 mile of the project area and the location of the site in relation to the San Juan River, depth to groundwater at the project area is estimated to be approximately 10 to 20 feet below ground surface (bgs). Hydraulic gradient direction is anticipated to be to the southwest, towards the San Juan River. New Mexico Office of the State Engineer (NMOSE) shows 110 registered water wells are located within 1-mile radius of the project area (EDR, 2023).

2.2.5 Current Use(s) of the Project Area and Adjoining Properties

The project area consists of the ROW of N. Bergin Lane from US 64 north to W. Blanco Blvd. N. Bergin Lane currently consists of a weathered asphalt road. Adjoining properties include some commercial, schools (Mesa Alta Junior High and Bloomfield Municipal Schools Administration), residential, and agricultural (San Juan Country Assessor's Office, 2024).

2.2.6 Description of Improvements within the Project Area

The N. Bergin Lane project area currently has a weathered asphalt road along its extent. Curbs or sidewalks are not present, except along the south portion of the west side of the roadway. Dirt berms are present along portions of the roadway. There are culverts and ditches along some of the berms to prevent drainage from the road from entering onto the adjacent parcels. Some of the berms contain sparse vegetation. Some adjacent properties have fences bordering N. Bergin Lane; some of the fences appear to be within the ROW. Note, however, the project area had not yet been staked.

Relevant information regarding utilities in the project area includes the following:

- **Potable water** – City of Bloomfield
- **Sanitary Sewer system** – City of Bloomfield
- **Electric service** – Farmington Electric Utility Service (overhead)
- **Natural gas** – Gas Company of New Mexico
- **Phone and internet** – Century Link, Xfinity
- **Cable TV** - Xfinity

3.0 User Provided Information

This section of the ESA report summarizes information provided to AES by the *User,* specifically by Lee Evans, City of Bloomfield, Operations City Engineer/Public Works Director. Section 6 of ASTM E1527-21 describes the type of information, such as title records, lien information, specialized knowledge, and owner/occupant information, the *User* can provide to assist in identifying *RECs* as part of an environmental site assessment. Mr. Evans provided AES with answers to *the User Questionnaire* on January 22, 2024. It is anticipated that this project will be administered by New Mexico Department of Transportation (NMDOT); therefore, NMDOT is also identified as a User of this Report. The completed *User Questionnaire and interview information* are included in Appendix C.

3.1 Title Records

A review of the chain of title was not completed as part of this Phase I ESA. The project area is within the N. Bergin Lane ROW from US 64 to W. Blanco Blvd.

3.2 Environmental Liens or Activity and Use Limitations

According to Mr. Evans, and as noted in the completed *User Questionnaire*, the *User* indicated no awareness of any environmental cleanup liens, activity limitations, engineering controls, land use restrictions, or institutional controls within the project area.

3.3 Specialized Knowledge

In the *User Questionnaire*, Mr. Evans had no specialized knowledge of the project area and was not aware of any potential asbestos coated water lines that might be present beneath N. Bergin Lane.

3.4 Commonly Known or Reasonably Ascertainable Information

In a *User Questionnaire*, Mr. Evans reported no knowledge that is commonly known or reasonably ascertainable pertaining to the past use of the project area that would be indicative of releases or threatened releases. He is also not aware of any spill history or environmental cleanups at the project area.

3.5 Valuation Reduction for Environmental Issues

According to Mr. Evans, there have been no valuation reductions for the property associated with environmental issues.

3.6 Reason for Performing ESA

This ESA was performed on behalf of the City of Bloomfield as part of due diligence associated with a pending road upgrade project for the project area.

4.0 Site Reconnaissance

On December 28, 2023, Elizabeth McNally and Kate Pickford, of AES, conducted reconnaissance of the project area. A follow up site visit was conducted by Kate Pickford on January 31, 2024. The purpose of the site visits was to obtain information on potential *RECs* in connection with the project area.

4.1 Methodology and Limiting Conditions

AES conducted the site reconnaissance using the methods outlined in Section 9 of the ASTM E1527-21 standard practice.

4.2 General Site Setting

The project area consists of the ROW of N. Bergin Lane, which includes driveway aprons, berms, and drainage ditches.

4.3 Observations

4.3.1 Project Area

During the site reconnaissance, Elizabeth McNally and Kate Pickford made observations regarding conditions at the project area using the methods outlined in Section 9.2 of the ASTM E1527-21 standard practice. A Photograph Log taken during the site reconnaissance is provided in Appendix A.

At the time of the site visit on December 28, 2023, the sky was clear and sunny. The ambient temperature was approximately 42 degrees Fahrenheit (F). During the follow up site visit on January 31, 2024, the sky was partly cloudy. The ambient temperature was approximately 56 degrees F. Observations included the following:

- The project area is relatively flat, but slopes gently to the southwest, and primarily consists of an asphalt roadway and adjacent dirt berms along the edges of the roadway, some with culverts to assist in controlling runoff from the road, which sits slightly higher that adjacent properties along portions of the road.

- Most of the project area has berms, some with drainage culverts, along the sides of the roadway to control drainage. No stormwater drain inlets were observed. A portion of the project area, including the school administration building and south along N. Bergin have curbs and sidewalks. *Photo Log photos #1 and #2.*
- Vegetation along the project area is sparse and consists primarily of weeds, such as Russian thistle. There are also cottonwoods along the ROW. *Photo Log photos #3 and #4.*
- There are structures along both sides of the project area, including a school and administration building, businesses, and residences. Agricultural land is also present in northern portion of the project area, on the west side of N. Bergin Lane. *Photos #5 through #11, and #18, #19, and #21 Photo Log.*
- Aboveground utility junctions (electric and gas) are visible along the ROW and some may be affected by the project. *Photos #12 and #13 in Photo Log.*
- Cluster mailboxes were observed within the project area on the west side of the road. *Photo #14 in Photo Log.*
- Electric transformers were observed on some of the utility poles adjacent to the ROW. *Photos #15 and #16, Photo Log.*
- Fences are present along portions of the ROW, and some appear to be within the proposed affected area. *Photo #17, Photo Log.*
- Businesses adjacent to the project area that required further investigation included Mario's Tire Shop and Calgon Carbon, formerly Benchmark Equipment and Tank and Bloomfield Machine and Welding. *Photos #9, #10, #18 and #19, Photo Log.*

4.3.2 Adjoining Properties

AES also made observations regarding adjoining areas consistent with, but not necessarily limited to, the features identified in Section 9.4 of ASTM E1527-21. These observations include the following:

- **To the northeast**: Just beyond the EOP to the northeast of the project area is the Farmington Electric Bergin Substation. *Photos #20, Photo Log.*
- **To the north**: vacant land lies north of the EOP.
- **West side of N. Bergin Lane:** The west side of the ROW contains a piece of agricultural land along the north end. Some vacant land and houses, which are set back from the ROW, are located to the south of the agricultural land. Housing is farther south, which is closer to the road. The Mesa Alta Junior High and school administrative buildings are located south of the housing. More residential buildings are located between the school buildings and US 64, and there is a business building located on the northwest corner of N. Bergin Lane and US 64. *Photos #4, #7, #8, #11, #12, #14, #15, and #21.*
- **To the south:** US 64 lies south of the BOP and runs east/west.

- **East side of N. Bergin Lane:** Residential structures occupy the east side of N. Bergin Lane. About halfway between the BOP and EOP is Calgon Carbon (formerly Benchmark Equipment and Tank and Bloomfield Machine and Welding). South of Calgon Carbon are residential structures. Mario's Tire Shop is located on the northeast corner of N. Bergin Lane and US 64. *Photos #3, #5, #6 #9, #10, #18, and #19, Photo Log.*

5.0 Records Review

AES conducted a review of *reasonably ascertainable* records to help identify *RECs* that might affect the development of the proposed project. The records review included a subcontracted search of standard environmental databases and manual search of select regulatory file records and other historical usage information.

Unless otherwise noted, AES used the standard ASTM E1527-21 approximate minimum search distances (AMSDs) to identify findings. Only those database searches for which actual findings were located within the applicable AMSDs are discussed in this report. Basic information pertaining to sites for which specific findings were reported is summarized in Section 8, and the full EDR Database Report is presented in Appendix B.

5.1 Physical Setting Source(s)

According to the Physical Setting Summary in the EDR Geocheck® - Physical Setting Source Addendum, topography has been determined from the USGS Digital Elevation Model using the USGS TP, Horn Canyon and SE, Bloomfield 7.5 Minute Series Topographic Quadrangle Maps (2020). The elevation at the project area is approximately 5,485 feet amsl. General topographic gradient is to the southwest, towards the San Juan River.

5.2 Historical Records Review

The objective of consulting historical sources is to develop a history of the previous uses of the project area and nearby vicinity, which can help identify the likelihood of past uses of the project area and may lead to identification of *RECs*. This task involves reviewing standard historical sources that are deemed necessary and are *reasonably ascertainable*.

5.2.1 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were requested as part of the EDR Report; however, none were available for the project area. The Sanborn report showing no coverage is presented in Appendix B.

5.2.2 Aerial Photographs

AES reviewed aerial photographs for the project area and general vicinity from 1954, 1964, 1971, 1978, 1981, 1986, 1997, 2011, 2016, and 2020 (USGS, 2020), and 2021 (EDR, 2023). Observations made during a review of aerial photographs are as follows:

- **1954:** The project area has a road that extends from US 64 to about halfway to W. Blanco Blvd. From the photo it cannot be determine what type of road surface is present. US 64 and W. Blanco Blvd are present. Land use surrounding the project area appears as all agricultural.
- **1964:** N. Bergin Lane has been extended all the way to W. Blanco Blvd. A large building is present where the junior high is now located, at 329 N. Bergin Lane. N. Bergin land appears to have been paved in this photo. There is a large parking lot on the northwest corner of US 64 and N. Bergin Lane. There is a large, cleared area on the northeast corner of US 64 and N. Bergin Lane, but from the photo, it cannot be determined how the area was used. The remainder of the project area is still surrounded by agricultural land.
- **1971:** Although more of the area to the northwest of US 64 has been developed, and there is an addition to the junior high building, most of the area in and around the project area remains unchanged
- **1978:** Very little change from the previous historic aerial photo.
- **1981:** Very little change from previous years. A new residential structure appears north of the junior high. The electric substation has been installed north of W Blanco Blvd., northeast of the project area.
- **1986:** More additions to the junior high building. Some residential structures near the northeast corner of N. Bergin Lane and W. Blanco Blvd., also across from the junior high.
- **1997:** An addition has been added to the north side of the junior high. The south half of the of the project area has residential structures along the east side of N. Bergin Lane, and more buildings affiliated with the school south of the junior high. With the exception of the residence on the SE corner of N. Bergin and W Blanco, the remainder of the north end of the project area is agricultural. A building on the northwest corner of US 64 and N. Bergin Lane is now visible, where a commercial building is currently located.
- **2011, 2016, 2020:** The school administration building is present south of the junior high. More area on the east side of N. Bergin Lane is residential. There is residential property on the west side of N. Bergin Lane between the school and W. Blanco Blvd. Some agricultural property still remains.

EDR aerial photographs reviewed by AES are included in Appendix B.

5.2.3 Topographic Maps

AES reviewed the following topographic maps:

- USGS SE Bloomfield, 15 Minute Series Topographic Quadrangle Map (1960)
- USGS TP Horn Canyon, 7.5 Minute Series Topographic Quadrangle Map (1965) 1:24,000 scale;
- USGS TP Horn Canyon, 7.5 Minute Series Topographic Quadrangle Map (1979) 1:24,000 scale; and
- USGS SE Bloomfield, 7.5 Minute Series Topographic Quadrangle Map (1985) 1:24,000 scale; and
- USGS TP Horn Canyon; SE Bloomfield, 7.5 Minute Series Topographic Quadrangle Map (2013) 1:24,000 scale.
- USGS TP Horn Canyon; SE Bloomfield, 7.5 Minute Series Topographic Quadrangle Map (2017) 1:24,000 scale.
- USGS TP Horn Canyon; SE Bloomfield, 7.5 Minute Series Topographic Quadrangle Map (2020) 1:24,000 scale.

A review of these USGS topographic maps indicates that the original topography was gently sloping to the south along the project area. There is a steep slope and hill to the north of the project area. The San Juan River is present approximately 0.85 miles to the south. The project area is approximately 5,485 feet amsl. A current Topographic Site Location Map is included as Figure 1, and topographic maps derived from the 2023 EDR Report are presented in Appendix B.

5.2.4 City Directories

City directories show ownership and/or use of sites by reference to street addresses and provide a way to determine the past uses of a property when no other information is available. City directory summary information for the N. Bergin Lane project area is included below:

City Directory Information for Project Area

Year	*N. Bergin Lane*
1964	Mesa Alta Junior High and residences
1968	Same as above
1973	Same as above
1978	Bloomfield Municipal Schools added
1983	Same as above
1988	Same as above
1992	Same as above

Year	*N. Bergin Lane*
1995	Same as above
2000	Same as above
2005	Bloomfield Machine and Welding added at 326 N. Bergin Lane. Senior apartments added 701 N. Bergin Lane
2010	Benchmark Equipment and Tank Inc. added at 326 N. Bergin Lane
2014	Same as above
2017	Same as above
2020	Same as above

The City Directories show that the adjacent properties on N. Bergin Lane were occupied as private residences, and the schools have been present from 1964 through current. Bloomfield Machine and Welding at 326 N. Bergin Lane and the senior apartments at 701 N. Bergin Lane were listed beginning in 2005. Benchmark Equipment and Tank, Inc began being listed at 326 N. Bergin Lane in 2010. The tire shop on the northeast corner of US 64 and N Bergin Lane is listed as Autographics Plus beginning in 2005. The City Directory Report generated by EDR is included in Appendix B.

5.2.5 Historical Records Information on Adjoining Properties

Historical use information on the adjoining properties was limited to a records search, including review of the aerial photographs, city directory records, and reference documents. Details of adjacent property use are as follows:

- The Farmington Electric Bergin substation on the adjoining property to the northeast was constructed sometime between 1978 and 1981. The substation is located on federal land (USGS, 2020).
- The adjacent property to the east was gradually developed as residential and commercial, primarily between 1964 and 1997 (EDR, 2023).
- The adjacent property to the west started development as a junior high and a parking lot on the NW corner of N. Bergin Lane and US 64, sometime between 1954 and 1964. Over the years, until 1978, further development of the Junior High were the only improvements in this area. Beginning in 1978, residential development started and continued through 2016 (EDR, 2023).
- The property to the south of the project area (south of US 64) was developed as a commercial property sometime between 1986 and 2011 (EDR, 2023).

5.3 Regulatory Records Review

AES reviewed an environmental database report prepared by EDR dated December 28, 2023. Per ASTM E1527-21, the database search included several regulatory lists and databases. The report generated findings within the applicable AMSDs. Findings are discussed in detail in Section 8. Additionally, findings on the project area and the adjacent areas and properties are presented in Table 1, on Figure 3A Findings Map (Project Area), and on Figure 3B Findings Map (Adjacent Properties).

In addition to the standard environmental database reviews required by ASTM E1527-21 Standard Practices, other optional databases are also often researched. Findings are discussed in detail in Section 8, and copies of requests for inspection of public records and agency responses are included in Appendix D.

5.3.1 Orphan Sites

Two orphan sites were identified in the EDR report, both of which were confirmed by AES to be located outside the minimum search distance for this investigation.

- Municipal Operation Center A, S Church St, LUST, L Tanks, Tanks database.
- D&D Oil, road to Aztec from Bloomfield, SCS database.

5.3.2 New Mexico Environment Department

On December 27, 2023, AES submitted a public records request for records maintained by New Mexico Environment Department (NMED). Additionally, on January 18, 2024, a search of the NMED Petroleum Storage Tank Bureau (PSTB) online database (https://gis.web.env.nm.gov/GoNM/) was conducted regarding the presence of aboveground storage tanks (ASTs), underground storage tanks (USTs), and leaking UST (LUSTs) on the project area and on adjacent areas and properties.

5.3.3 City of Bloomfield

On December 27, 2023, AES submitted a public records request for public records maintained by City of Bloomfield.

5.3.4 New Mexico Oil Conservation Division (NMOCD)

Based upon information contained in the EDR Report, there are 47 oil and gas wells within a 1-mile radius of the project area, 1 of which is up-gradient and within a 0.5-mile radius from the project area. On January 9, 2024, AES further utilized the NMOCD Well File Search online database (http://ocdimage.emnrd.state.nm.us/imaging/WellFileCriteria.aspx) to investigate any releases at all oil and gas wells up-gradient and within a 0.5-mile radius of the project area.

- Bergin #001, NMOCD well #045-08051 is plugged and the site released. This location is within 1/8 mile of the project area, is cross-gradient from the project area, and this well has no record of a release.
- Bergin Gas Com #001E, NMOCD well #30-045-23756 is currently active. This location is within 1/8 mile of the project area, is cross-gradient from the project area, and has no record of a release.
- John Bergin #002, NMOCD well #30-045-08025 is plugged and the site released. This location is down-gradient from the project area, and this well has no record of a release.
- John Bergin #001, NMOCD well # 30-045-34435, is currently active. This location is within ¼ mile of the project area, is down-gradient from the project area, and has no record of a release.
- Bergin Gas Com #001F, NMOCD well #30-045-34435 is not drilled. This location is within 1/8 mile of the project area, is up-gradient from the project area, and has no record of a release.
- Bergin #001, NMOCD well #045-08162 is plugged, and the site released. This location is within 1/2 mile of the project area, is cross-gradient from the project area, and has no record of a release.
- Bergin #009, NMOCD well #045-08027 is plugged and the site released. This location is within 1/2 mile of the project area, is cross-gradient from the project area, and has no record of a release.
- Bergin Gas Com #001, NMOCD well #30-045-08099 is currently active. This location is within 1/2 mile of the project area, is up-gradient from the project area, and has no record of a release.
- Wade #001, NMOCD well #045-08125 is plugged and the site released. This location is within 1/2 mile of the project area, is cross-gradient from the project area, and has no record of a release.
- Duggan WE #002, NMOCD well #045-08060 is plugged, and the site released. This location is within 1/2 mile of the project area, is down-gradient from the project area, and has no record of a release.
- Sategna #001R, NMOCD well #30-045-07974 is currently active. This location is within 1/2 mile of the project area, is down-gradient from the project area, and has no record of a release.
- Sategna #002, NMOCD well #30-045-30587 is plugged site released. This location is within 1/2 mile of the project area, is down-gradient from the project area, and has no record of a release.

5.3.5 San Juan County Assessor

On January 11, 2024, the San Juan County Assessor online resource (https://webmaps.sjcounty.net/portal/apps/webappviewer) was utilized to retrieve aerial imagery from 2023.

6.0 Interviews

AES interviewed the *User* (Lee Evans) and others as part of the due diligence for this report. Public information requests were submitted to city and state agencies. Interview and public information request documentation is included in Appendix D.

6.1 Interviews with Owners and Occupants

- **Wally Esparza**, Manager of Mario's Tire Shop, 1940 W Broadway Ave, Bloomfield, NM, was interviewed by Angela Todd, AES, on January 22, 2024.
- **Robert Graphings**, Production Manager II of Calgon Carbon (Formerly Benchmark Equipment and Tank), 326 N Bergin Ln, Bloomfield, NM, was interviewed by Angela Todd, AES, on January 22, 2024.
- **Nicholas Russell,** District Facilities Manager, Bloomfield School District, 326 and 345 N., Bergin Lane, Bloomfield, NM, was interviewed by Kate Pickford February 12, 2024.

6.2 Interviews with State and Local Government Officials

No other government officials were interviewed relative to the project area outside of the User, Lee Evans, Operations City Engineer/Public Works Director City of Bloomfield.

6.3 Interviews with Others

- Ross Kennemer, Environmental Consulting Manager at Seneca Companies, Inc., former Principal at Animas Environmental Services, and lifelong resident of Bloomfield, NM, was interviewed by AES personnel on January 31, 2024.
- Nelson Velez, Environmental Specialist, NMOCD, was interviewed by AES personnel on February 16, 2024.

7.0 Non-Scope Services

No additional services were completed under the Scope of Work associated with this Phase I ESA.

8.0 Findings

As part of this ESA, AES gathered and reviewed technical information, historical records, and environmental documents that were *reasonably ascertainable*. Also, a reconnaissance

of the project location was conducted to observe and record information pertaining to obvious environmental hazards, hazardous waste disposal, solid waste disposal, nearby USTs, and other environmental issues.

Based on the records review, historical research, and site reconnaissance, AES has identified the project area and adjacent properties as areas where releases of hazardous materials or petroleum products have or could have occurred. These areas are referred to as findings, and the following sections describe findings based on their location. A total of **13 findings** were identified, and a summary of all findings on the project area and adjoining areas and properties are presented in Table 1 and on Figures 3A and 3B.

8.1 Project Area

The project area consists of the N. Bergin Lane ROW and is approximately 0.5 miles in length. The width of the proposed project will vary between approximately 38 to 45 feet. Anticipated project task depth is estimated to be 1 foot for currently proposed roadway improvements. Based on information derived from a combination of historical and regulatory records, visual observations, and information provided by the *Owner, Occupant,* and *User*, **13 findings** were identified at the project area and are summarized below, in Table 1, and on Figure 3A. Site photographs are included in Appendix A.

Finding F1 – Former irrigation ditch/culvert.
A shallow ditch and culvert is located on the east side of N. Bergin Lane and varies from being fully open to being buried. According to Lee Evans, the ditch was used as an irrigation ditch in the past, but it now mainly serves the purpose of a tail-water ditch and storm runoff. There were no signs of spills, staining, or releases in the area during the site inspections, and there are no records of releases or spills according to Lee Evans, City of Bloomfield (Evans, 2024).

Finding F2 – Mario's Tire Shop, 1940 W. Broadway Ave.
This business is located on the northeast corner of N. Bergin Lane and US 64. The 2020 and 2016 aerial photos show the business with more tires accumulating over time (EDR, 2023).

Mr. Kennemer stated that this facility used to perform automotive repairs in addition to selling tires, but he did not provide a timeframe (Kenemmer, 2024). During the site reconnaissance, it was observed that a very large number of tires are stored at the site. One 5-gallon bucket was also observed, with unknown contents. However, other than *de minimis* staining, there were no visible signs of significant spills, staining, or releases in the area.

The current manager, Wally Esparza, stated there are tires piled on the property including some approximately 50 feet from the eastern curb of N. Bergin Lane. Mr. Esparza stated these could be moved if the City needs them to be for the road improvement project. Mr. Esparza stated the 5-gallon bucket is empty, and the business does no auto maintenance other than changing tires. Mr. Esparza is not aware of any spills having occurred at the property (Esparza, 2024).

Finding F3 – Bloomfield Machine and Welding (currently Calgon Carbon), 326 N Bergin Ln. This business shares the same address as the business identified in F4 (Bloomfield Machine and Welding), as indicated in the City Directory portion of the EDR (EDR, 2023) and the signage adjacent to N. Bergin Lane in front of the facility (Photo #18, Photo Log). The listing for this business first appears in the City Directory in 2005 (EDR, 2023)

Mr. Kennemer stated that this facility had ongoing issues with fugitive air emissions from their paint booth in the past. He also stated that surficial soil at the facility was likely impacted from the tanks stored on the property without secondary containment (Kenemmer, 2024).

During the site reconnaissance, it was observed the portion of the property located adjacent to N. Bergin Lane is vacant and barren, and it is uncertain what this lot has been used for in the past. It is expected chemicals related to machining and welding are stored at the site. There were no signs of spills, staining, or releases in the area noted during the site inspection.

Robert Graphings, Production Manager II, Calgon Carbon, stated Calgon Carbon acquired Benchmark Equipment and Tank in September of 2023. Mr. Graphings further stated there are no USTs on the property and to his knowledge, there have been no spills on the property. (Graphings, 2024).

Finding F4 -Benchmark Equipment and Tank (currently Calgon Carbon), 326 N Bergin Ln. This business shares the same address as the business identified in F3 (Bloomfield Machine and Welding), as indicated in the City Directory portion of the EDR (EDR, 2023) and the signage adjacent to N. Bergin Lane in front of the facility (Photo #18, Photo Log). The listing for this business first appears in the City Directory in 2010 (EDR, 2023). The business appears in the New Mexico AIR database, Registry ID: 10035864339, and has been involved in the New Mexico air monitoring program since 2008.

Mr. Kennemer stated that this facility had historic longterm issues with fugitive air emissions from their paint booth. He also stated that surficial soil at the facility was likely

impacted from the tanks stored on the property without secondary containment (Kenemmer, 2024).

The vacant land on the property adjacent to N. Bergin Lane observed during the site reconnaissance has an unknown history of potential of having buried tanks. However, there were no signs of spills, staining, or releases in the area.

Robert Graphings, Production Manager II, Calgon Carbon, stated Calgon Carbon acquired Benchmark Equipment and Tank in September of 2023. The air permit held by Benchmark was for a spray-painting booth, located on the west side of the property. Mr. Graphings further stated there are no USTs on the property and to his knowledge, there have been no spills on the property. (Graphings, 2024). although the current manager states there are no USTs at the site.

Finding F5 – Pole-mounted Electric Transformers.
Several pole-mounted transformers were observed mounted to the poles along N. Bergin Lane during the site reconnaissance. Electrical service is provided by the Farmington Electric Utility System (FEUS), which is owned and operated by the City of Farmington. Based upon prior correspondence between AES and Dale Smith, Estimator Superintendent of the City of Farmington Electric Utility Department, in 2013 and confirmed again in 2019, all FEUS transformers are free of polychlorinated biphenyls (PCBs). PCBs are not anticipated to be present in the transformers observed during site reconnaissance. No staining on the power poles or on the ground was noted during site inspections.

Finding F6 – Bloomfield Municipal Schools, 345 N. Bergin Lane.
This property is located on the west side of N. Bergin Lane. A portion of the parking lot for this building is located within the ROW of N. Bergin Lane. The facility is listed in the City Directory beginning in 1978 (EDR, 2023). This facility also appears in the ICIS AIR database. According to the database records, it was monitored in 2014 related to "Commercial and Institutional Building Construction." It is assigned Envid: 1017382457; Facility Registry Service (FRS) ID: 110062685786; ICIS-Air Identifier: NM0000003504584901. Report Status: Clean Air Act (CAA) Permanently Closed Emissions classification unknown (USEPA, 2022).

The current building does not appear in aerial photographs until 2011. But prior to this time, aerial photographs show another, smaller building which may have housed this facility.

Mr. Allen, Bloomfield Schools, stated he has only been employed with the City of Bloomfield Schools for seven months and is not aware of any spills and is unfamiliar with the air monitoring history (Allen, 2024).

There were no signs of spills, staining, or releases in the area noted during the site inspection.

Finding F7 – Mesa Alta Junior High, 329 N. Bergin Lane.
This property is located on the west side of N. Bergin Lane. The City Directory lists this school as far back as the beginning of the search history, 1964 (EDR, 2023) . The original building first appears in aerial photographs in 1964. According to aerial photographs, the building was gradually added onto over the years (EDR, 2023). This facility is identified in the EDR as having undergone asbestos mitigation in 2012 (EPA ID number S11858071.) (EDR, 2023). A portion of the parking lot for this building is located within the ROW of N. Bergin Lane.

Mr. Allen stated has only been employed with the City of Bloomfield Schools for seven months and was not aware of any spills and was unfamiliar with the asbestos mitigation at the site (Allen, 2024).

There were no signs of spills, staining, or releases in the area noted during the site inspection.

8.2 Adjoining Properties and AMSD Findings

The historic and regulatory record searches, interviews, and site reconnaissance performed as a part of this ESA revealed **six findings** on adjacent properties and within the AMSD of the project area (USGS, 2020).

Finding F8 – Farming Electric Bergin Substation. 521 W. Blanco Blvd.
This property is located northeast of the EOP, on the north side of W. Blanco Blvd. The San Juan County assessor's office identifies the property this facility is located on as being Bureau of Land Management (BLM). The substation belongs to Farmington Electric and is located approximately 200 feet from the project area. There were no signs of spills, staining, or releases in the area observed during the site inspection.

Finding F9 – Former Truck Wash. 1945 West Broadway.
This site is 0.08 miles from the BOP of the project area and is cross gradient from the BOP. Mr. Kennemer stated that in addition to this facility being a truck wash, it also used to service oilfield trucks and equipment and had sumps/sand filters to filter wash water. He said that they were storing many automotive maintenance products outside on the site without secondary containment. He did not provide a timeframe for when the truck wash was in operation (Kenemmer, 2024).

Finding F10 - Roadrunner Carwash/Roadrunner Mini Storage. 1600 West Broadway.
This is a large truck wash that services oilfield trucks and equipment and is cross-gradient from the BOP. Mr. Kennemer stated they had a case of illegal dumping of oil and/or fuel into their truck wash's sump/sand filters. He also stated that they used to stockpile the materials they cleaned out of their sumps/sand filters on site with no containment. He did not provide a timeframe for any of these events or activities (Kenemmer, 2024).

Finding F11 – Cross Refinery, Newby Lane. Unknown address.
This former refinery is listed in the EDR and is located approximately 0.473 mile west (cross-gradient) of the project area (EDR, 2023). The USEPA Superfund website shows USEPA ID NMD986669018, and indicates the site does not qualify for the National Priorities List (NPL) as of 1990 (USEPA, 2024).

A San Juan County assessor's aerial photo from 1976 does not show the facility (San Juan County Assessor, 2024). All aerial photos of the area included in the EDR show agricultural use (EDR, 2023).

AES also contacted the NMED groundwater Bureau and New Mexico OCD seeking information. Nelson Velez of OCD stated he could not find any additional information and confirmed he found a record in the EPA Superfund database but could not supply any additional information. He does not have any familiarity with the site (Velez, 2024). AES contacted Region 6 EPA Superfund Program for further information and received a document from their files dated February 12, 1990, which stated the site was a small refinery that produced 6 to 8 barrels of high-grade fuel oil daily. Operations ceased in the 1950s and the facility was dismantled, the ground leveled, and the surface reclaimed with vegetation. The land was returned to agricultural and residential use. The EPA reports in the document that the likely pathway for any contamination would be groundwater and no contamination has been reported. It also stated that there were no signs of staining and no further action was required at the site. The document supplied by the EPA is included in Appendix B.

Finding F12 – Sierra Gloria UST, 1628 E NM Route 64.
The EDR reports this site is located 0.224 miles from the project area (EDR, 2023). The site is assigned UST #U003190254. Two 2,000-gallon USTs were removed from this site at an unreported date. The NMED database does not contain any further information on this site. AES contacted the NMED-PSTB Inspector, Bob Bouren, who supplied additional records. The only added information is the release date of 1991, and the last status date is 2006. The tanks were steel, and ownership was reported in 1992 as Norma Gonzales. Ms. Gonzales was listed as the owner since March 31, 1989, and in 1992 sold the facility to Gloria Sierra of Bloomfield (Bouren, 2024).

This location is cross-gradient from BOP.

Finding F13 – Gas well. According to the EDR and the OCD database, there is one gas well located upgradient of the project area – Bergin Gas COM #001, API# 30-045-08099. The OCD database has no record of spills at this site.

9.0 Opinions

AES identified a total of **13 Findings** as part of the Phase I ESA, seven of which were associated with the project area (**Findings F1 through F7**). Six findings for other properties within the minimum search distance specified by ASTM (**Findings F8-F13)** were also identified.

The following section provides the thresholds used by AES to evaluate findings and determine whether a given finding has the potential to impact the project locations and is therefore considered to be a REC. To be considered a REC, it is AES' opinion that at least one of the following conditions of the REC definition must apply to the finding:

- **REC:** As defined in Section 3.2.73 of ASTM E1527-21, (1) the presence of hazardous substances or petroleum products in, on, or at the project area due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the project area due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the project area under conditions that pose a material threat of a future release to the environment.

- **Controlled REC:** As defined in Section 3.2.17 in the ASTM E1527-21 standard, this is a REC affecting the project area that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

Regarding the use of professional judgment in evaluating the findings made in this ESA, it is AES' opinion that the following situations **do not** warrant designation as *RECs*:

> ***De minimis*** findings such as small, isolated areas of soil staining or surface spills or releases located on the project location that do not indicate a pattern of repeat/chronic releases.

Historical REC: Defined in Section 3.2.39 in the ASTM E1527-21 standard *"*as a previous release of hazardous substances or petroleum products affecting the project area that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the property to any controls (for example activity and use limitations, or other property use limitations)." The E1527-21 standard further requires environmental consultants and professionals to evaluate any past closures of a contaminated site and the environmental assessment data associated with such closure to confirm that the assessment meets the current standards for unrestricted use.

The following is a summary of findings and opinions identified during this ESA:

9.1 Project Area

- **Finding F1 – Former irrigation ditch/culvert.** A ditch and culvert formerly used as an irrigation ditch but now used for runoff is located on the east side of N. Bergin Lane. This finding does not meet the definition of a *REC.*

- **Finding F2 – Mario's Tire Shop, 1940 W. Broadway Ave.** This business stores a large number of tires and *de minimis* staining. One 5-gallon bucket was also observed, with unknown contents. This finding does not meet the definition of a *REC.*

- **Finding F3 – Bloomfield Machine and Welding (currently Calgon Carbon), 326 N Bergin Ln**. It is expected chemicals related to machining and welding are stored at the site. The current manager states there are not USTs onsite, and there have been no reported releases or spills. This finding does not meet the definition of a *REC.*

- **Finding F4 -Benchmark Equipment and Tank (currently Calgon Carbon), 326 N Bergin Ln.** It had an AIR permit for a paint booth. The current manager states there are no USTs on the site, and there have been no reported releases or spills. This finding does not meet the definition of a *REC.*

- **Finding F5 – Pole mounted transformers.** Several pole mounted transformers mounted to the poles along N. Bergin Lane are not expected to contain PCBs per previous communication with the City of Farmington. This finding does not meet the definition of a *REC.*

- **Finding F6 – Bloomfield Municipal Schools, 345 N. Bergin Lane.** This facility appears in the ICIS AIR database for construction in 2014. This finding does not meet the definition of a *REC.*

- **Finding F7 – Mesa Alta Junior High, 329 N. Bergin Lane .** This facility is identified in the EDR as having undergone asbestos mitigation in 2012. This finding does not meet the definition of a *REC.*

9.2 Adjacent Properties and Properties within AMSD

- **Finding F8 – Electric substation.** The substation is located approximately 200 feet from the project area. There have been no reported releases or spills associated with this facility. This finding does not meet the definition of a *REC.*

- **Finding F9 – Truck Wash.** Former Truck Wash, 1945 West Broadway, Historical service of oilfield trucks and equipment and uncontained maintenance materials storage. Cross-gradient of BOP. This finding does not meet the definition of a *REC.*

- **Finding F10 –** Roadrunner Carwash/Roadrunner Mini Storage. 1600 West Broadway. Services oilfield trucks and equipment. History of possible discharge or storage of oil and/or fuel and stockpiling of materials with no containment. Cross-gradient from BOP. This finding does not meet the definition of a *REC.*

- **Finding F11 – Cross Refinery, Newby Lane.** This site is documented in the EPA Superfund database. The location of the facility is reported to be west (i.e. downgradient) of the facility and is therefore unlikely to be hydraulically connected to the project area. The EPA supplied documentation that the site has no history of contamination, and the EPA required no further action. This finding does not meet the definition of a *REC.*

- **Finding F12 – Sierra Gloria UST, 1628 E NM Route 64.** Two 2,000-gallon USTs were removed from this site at an unreported date. According to information received from NMED-PTSB, the site has had no reporting since 2006. No release has been reported or confirmed for this facility. This finding does not meet the definition of a *REC.*

- **Finding F13 – Gas well.** Bergin Gas COM #001, API# 30-045-08099. The OCD database has no record of spills at this site. This finding does not meet the definition of a *REC.*

9.3 Data Gaps and Data Failures

No data gaps or data failures were identified during the process of completing this Phase I ESA, with the exception of the lack of regulatory records and information about the Former Cross Refinery. However, the location of this facility is west of the project area and is cross and down-gradient from Bergin Lane. Given its location, it does not meet the definition of a *REC* with regard to the project area or project scope.

10.0 Conclusions

AES has performed a Phase I ESA at N. Bergin Lane Improvement Project, N. Bergin Lane Bloomfield, New Mexico, in conformance with the scope and limitations of ASTM Standard E 1527-21 and the NMDOT Hazardous Material Investigation Handbook (NMDOT, September 2021). Any exceptions to, or deletions from, this practice are described in Sections 1.4 and 1.5 of this report. This assessment has revealed **No *RECs* in connection with the project area.**

11.0 Signature(s) of Environmental Professional(s)

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the project area. We have developed and performed the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. A Statement of Qualifications has been included in Appendix E.
Submitted by:

Kate Pickford
Project Manager

Elizabeth McNally
Principal/Environmental Professional

Photograph Log
N. Bergin Lane Improvement Project

Photo No.: 1	**Date:** 1/31/2024

Description:

Looking southeast from N. Bergin Lane, along the east side of the project area ROW. A portion of the stormwater drainage and previous irrigation ditch.

Photo No.: 2	**Date:** 1/31/2024

Description:

Looking south from the west side of N. Bergin Lane from the school administration building. Existing curbs and sidewalks along the southern part of the project area.

Photo No.: 3	Date: 1/31/2024

Description:

Looking northeast from N. Bergin Lane towards Mario's Tire. Berm east of the ROW is devoid of vegetation except for cottonwood trees.

Photo No.: 4	Date: 1/31/2024

Description:

Looking west from N. Bergin Lane. Cottonwood trees along the west side of the project area.

Photo No.: 5	**Date:** 12/28/2023

Description:

Looking northwest from N. Bergin Lane. Example of a residence on the east side of N. Bergin Lane.

Photo No.: 6	**Date:** 1/31/2023

Description:

Looking east from N. Bergin Lane. Example of a residence on the east side of N. Bergin Lane.

Photo No.: 7	Date: 1/31/2024

Description:

Looking west from N. Bergin Lane. Bloomfield Municipal Schools Administration Building.

Photo No.: 8	Date: 1/31/2024

Description:

Looking southwest from N. Bergin Lane. Mesa Alta Junior High.

Photo No.: 9	**Date:** 12/28/2023

Description:

Looking northeast from N. Bergin Lane. Mario's Tire Shop.

Photo No.: 10	**Date:** 12/28/2023

Description:

Looking east from N. Bergin Lane. Activity at Mario's Tire Shop. Note 5-gallon bucket beside truck.

Photo No.: 11	Date: 1/31/2024

Description:

Looking west from N. Bergin Lane. Agricultural land on northwest corner of N. Bergin Lane and W. Blanco Lane.

Photo No.: 12	Date: 1/31/2024

Description:

Looking west from N. Bergin Lane. Note electrical box next to project area.

Photo No.: 13	Date: 1/31/2024

Description:

Looking south along the east side of Bergin Lane. Note natural gas supply line.

Photo No.: 14	Date: 1/31/2024

Description:

Looking west from N. Bergin Lane. Note cluster mailboxes in project area.

Photo No.: 15	Date: 1/31/2024

Description:

Looking northwest from Bergin Lane. Transformer on utility pole.

Photo No.: 16	Date: 1/31/2024

Description:

Looking north from Bergin Lane. Transformer on utility pole.

Photo No.: 17	**Date:** 1/31/2024

Description:

Looking south along N. Bergin Lane. Fence may be within project area.

Photo No.: 18	**Date:** 12/28/2023

Description:

Looking northeast from N. Bergin Lane. Benchmark Equipment and Tank and Bloomfield Machine and Welding.

Photo No.: 19	**Date:** 1/31/2024
Description: Looking east from N. Bergin Lane over the vacant lot between N. Bergin Lane and Benchmark Equipment and Tank and Bloomfield Machine and Welding.	

Photo No.: 20	**Date:** 12/28/2023
Description: Looking northeast from the EOP towards the Farmington Electric substation.	

Photo No.: 21	**Date:** 1/31/2024

Description:

Business on northwest corner of N. Bergin Lane and HWY 64.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no

further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 09/19/2023 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
CROSS REFINERY Site ID: 0604085 EPA Id: NMD986669018	NEWBY LANE	W 1/4 - 1/2 (0.473 mi.)	5	10

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the New Mexico Environmental Department's Listing of Underground Storage Tanks.

A review of the UST list, as provided by EDR, and dated 08/01/2006 has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
SIERRA GLORIA Facility Id: 30602 Tank Status: REMOVED	1628 E NM ROUTE 64	SE 1/8 - 1/4 (0.224 mi.)	4	9

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 11/03/2023 has revealed that there are 2 FINDS sites within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
BLOOMFIELD MUNI SCHO Registry ID:: 110062685786	***345 N BERGIN LANE***	***0 - 1/8 (0.000 mi.)***	***A2***	***8***
BENCHMARK EQUIPMENT Registry ID:: 110035864339	326 BERGIN LN	0 - 1/8 (0.000 mi.)	3	9

ECHO: ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

A review of the ECHO list, as provided by EDR, and dated 06/24/2023 has revealed that there is 1 ECHO site within approximately 0.001 miles of the target property.

ASBESTOS: Asbestos is a common fibrous rock found worldwide which has been used in various products for over 4500 years. It has been used in over 3000 different products such as textiles, paper, ropes, wicks, stoves, filters, floor tiles, roofing shingles, clutch facings, water pipe, cements, fillers, felt, fireproof clothing, gaskets, battery boxes, clapboard, wallboard, fire doors, fire curtains, insulation, brake linings, etc.

A review of the ASBESTOS list, as provided by EDR, and dated 04/13/2023 has revealed that there is 1 ASBESTOS site within approximately 0.001 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/19/2023

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/19/2023
Date Data Arrived at EDR: 10/03/2023

Next Scheduled EDR Contact: 01/08/2024
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Data Release Frequency: No Update Planned

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/19/2023
Date Data Arrived at EDR: 10/03/2023

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/25/2023

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Data Release Frequency: Varies

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

NY MANIFEST: Facility and Manifest Data

Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Date of Government Version: 12/31/2019

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 5470 ft.

0 1/2 1 Miles

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
35045C1035F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
35045C1055F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
HORN CANYON	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Tertiary
Series:	Paleocene
Code:	Txc *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Continental Deposits

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	FRUITLAND
Soil Surface Texture:	sandy loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	HIGH
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	7 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 8.40 Min: 7.40
2	7 inches	60 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 8.40 Min: 7.40

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: clay loam
loam
fine sandy loam

Surficial Soil Types: clay loam
loam
fine sandy loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: clay loam
very gravelly - loamy sand
stratified
silt loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: US Fish & Wildlife Service
Telephone: 505-248-6660

HYDROGEOLOGIC INFORMATION

AQUIFLOW[R] Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Animas Environmental Services were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # EAD7-496F-8E0C

PO # NA

Project Bergin Lane Phase I ESA

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: EAD7-496F-8E0C

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ✔ Library of Congress
- ✔ University Publications of America
- ✔ EDR Private Collection

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Animas Environmental Services were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

The soil surveys that comprise your AOI were mapped at 1:63,400.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: San Juan County, New Mexico, Eastern Part
Survey Area Data: Version 19, Sep 8, 2023

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Nov 25, 2021—Jan 20, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
Fs	Fruitland sandy loam, 2 to 5 percent slopes	15.4	17.2%
Ft	Fruitland sandy loam, wet, 0 to 2 percent slopes	8.6	9.6%
Fu	Fruitland loam, 1 to 3 percent slopes	0.2	0.2%
Fw	Fruitland loam, 5 to 8 percent slopes	23.1	25.9%
HA	Haplargids-Blackston-Torriorthents complex, very steep	9.7	10.8%
SV	Stumble sandy clay loam, gently sloping	24.4	27.3%
SW	Stumble-Fruitland association, gently sloping	8.0	8.9%
Totals for Area of Interest		**89.3**	**100.0%**

Superfund Site Strategy Recommendation Region 6

Site Name: Cross Refinery Site Number: NMD986669018

Alias Site Name(s): _____

Address: Nawby Lane

City/County or Parish/State/Zip: Bloomfield/San Juan/NM

Recommendation:

[xx] 1. No further remedial action planned under Superfund.

[ ] 2. Further pre-remedial investigative action needed under Superfund:

PA _____ Priority: High _____
SSI _____ Medium _____
LSI _____
Other _____
To be performed by _____

[ ] 3. Action may be appropriate under other authority:
NPDES _____ SPCC _____ 404 _____ TSCA _____
UIC _____ SMCRA _____ STATE _____ RCRA _____
OTHER _____

Discussion: PA

Cross Refinery was at one time a small facility which produced 6-8 barrels per day of high grade fuel oil by using a conventional fractional distillation process. Since operations ceased in the 1950's, the refinery has been dismantled and carted away and the ground surface reclaimed, leveled, and planted as pastureland, or used for farm buildings and residences. The ground water pathway is the most feasible to score for the site, and no contamination by organic compounds has been reported for the area. It is unlikely that large discharges of waste water occurred at the site; because, it was such a small operation. No stressed vegetation or soil stains were noted. Because, there is nothing left of the facility and no evidence of hazardous waste on the ground surface; no further remedial action is recommended for this site.

Appendix C

ASTM E1527 - 21 Standard Practice for Environmental Site Assessments

User Questionnaire

Referenced Property:	N. Bergin Lane Improvement Project, Between Hwy 64 and Blanco Blvd.
Name:	Lee Evans
Title:	Operations City Engineer/Public Works Director
Company:	City of Bloomfield
Date:	1/22/24
Time:	7:00

1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

I am not aware of any.

2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Are you aware of any Activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

No, I am not.

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the user of the ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

All properties adjacent to this project are residential, except for one. Calgon Carbon has a driveway to its property from Bergin Lane, but the manufacturing processes take place far away from Bergin Lane. This site has been a metal tank manufacturing facility for many years, I do not think it could have any detrimental effect on the project at Bergin Lane.

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because of contamination is known or believed to be present at the property?

The site is not contaminated.

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

a. **Do you know the past uses of the property? Yes, it has been a City street for at least 60 years.**
b. Do you know the specific chemicals that are present or once were present at the property? None
c. **Do you know of spills or other chemical releases that have taken place at the property? None**
d. **Do you know of any environmental cleanups that have taken place at the property? None**

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property? There has no contamination I am aware of.

7. Additional information: this information is intended to assist the environmental professional but is not necessarily required to qualify for one of the LLPs.

a. Are you aware of any other people and/or business entities that will be using this ESA for their reliance? If so, please list the business name and the name of a contact person (if known to you). None

b. What is the reason the Phase I ESA is required?
State funding is involved, therefore a ESA is required.

c. **What is the type of property transaction, for example, sale, purchase, exchange, etc.?**
We are building a new street.

Robert Gaphings, Production Manager II, Calgon Carbon
Interview Documentation
North Bergin Lane Improvement Project Phase I ESA

Date:	January 22, 2024
Person(s) Interviewed:	Robert Gaphings Production Manager II Calgon Carbon 505-632-9030
Interviewed by:	Angela Todd, Senior Project Manager Animas Environmental Services, LLC

Mr. Gaphings stated that Calgon Carbon acquired Benchmark Equipment and Tank in September 2023. The air permit that was held by Benchmark was for a spray painting booth, which is located on the western side of the property near Ruth Lane. He stated that there are no USTs present on the property.

Mr. Gaphings stated that to his knowledge there have been no spills at the property. He notes that the Calgon Carbon property consists of only their driveway on the Bergin Lane side of their parcel. He stated that there is a water line (perhaps 8” diameter) that runs parallel to the driveway (east and west).

Benchmark was acquired in September 2023. That permit is no longer in use. Calgon Carbon will be getting a new permit themselves. The air permit will ocver a spray painting booth. There are no USTs at the site.

Wally Esparza, Manager of Mario's Tire Shop
Interview Documentation
North Bergin Lane Improvement Project Phase I ESA

Date:	January 22, 2024
Person(s) Interviewed:	Wally Esparza Manager Mario's Tire Shop 505-402-1015
Interviewed by:	Angela Todd, Senior Project Manager Animas Environmental Services, LLC

Mr. Esparza stated that he has no knowledge of any spills having occurred at the property. He stated that Mario's Tire Shop does not perform any automotive maintenance activities aside from changing tires; however, when I asked him about the five-gallon bucket that was observed near the Esparza Trucking rig, he said he was doing work on his own vehicle and that the bucket was empty.

According to Mr. Esparza, the tire piles are located approximately 50 feet from the eastern curb of North Bergin. If needed, the tires could be moved. He says that there are no areas of stained soil near the tire piles.

Ross Kennemer, Environmental Consulting Manager, Seneca Companies, Inc.
Interview Documentation
North Bergin Lane Improvement Project Phase I ESA

Date:	January 31, 2024
Person(s) Interviewed:	Ross Kennemer Environmental Consulting Manager Seneca Companies, Inc. 918-405-0400
Interviewed by:	Angela Todd, Senior Project Manager Animas Environmental Services, LLC

Mr. Kennemer worked on several projects along or near North Bergin Lane as a former environmental consultant in Farmington, New Mexico. He stated that sites of concern near North Bergin Lane include the following:

- Roadrunner Carwash/Roadrunner Mini Storage (1600 West Broadway): This is a large truck wash that services oilfield trucks and equipment. They had a case of illegal dumping of oil and/or fuel into their truck wash's sump/sand filters. Also, Mr. Kennemer stated that they used to stockpile the materials they cleaned out of the their sumps/sand filters on site with no containment. He did not provide a timeframe for any of these events or activities.
- Former Truck Wash (1945 West Broadway): Mr. Kennemer stated that they also used to service oilfield trucks and equipment and had sumps/sand filters to filter wash water. He said that they were storing many automotive maintenance products outside on the site without secondary containment. He did not provide a timeframe for when the truck wash was in operation.
- Benchmark Equipment and Tank (326 North Bergin Lane): Mr. Kennemer stated that this facility had ongoing issues with fugitive air emissions from their paint booth. He also stated that surficial soil at the facility was likely impacted from the tanks stored on the property without secondary containment.
- Mario's Tire Shop (1940 West Broadway) – Mr. Kennemer stated that this facility used to perform automotive repairs in addition to selling tires, but he did not provide a timeframe.

Nicholas Allen, District Facilities Manager, Bloomfield School District
Interview Documentation
North Bergin Lane Improvement Project Phase I ESA

Date:	February 12, 2024
Person(s) Interviewed:	Nicholas Allen District Facilities Manager Bloomfield Schools 505-634-3462
Interviewed by:	Kate Pickford, Project Manager Animas Environmental Services, LLC

Mr. Allen stated he has no knowledge of any spills having occurred at the property. He stated he has only been employed with the school district for 7 months and had no knowledge of historical potential contamination. He was also not aware of the asbestos mitigation that occurred in 2012 at Mesa Alta Junior High, nor the reason the administration building is in the ICIS AIR database.

Nelson Velez, Environmental Specialist – Adv, New Mexico Environmental Bureau
EMNRD - Oil Conservation Division
Interview Documentation
North Bergin Lane Improvement Project Phase I ESA

Date:	February 16, 2024
Person(s) Interviewed:	Nelson Velez Environmental Specialist - Adv EMNRD – Oil Conservation Division 505-469-6146
Interviewed by:	Lany Cupps, Environmental Coordinator Animas Environmental Services, LLC

Mr. Velez stated that he had looked for NMOCD files relating to a refinery located on Newby Lane and found none. He said that it does appear to be listed as a USEPA Superfund site, but that he could not find any additional information. He said that to his knowledge no refinery was ever located on Newby Lane and that he has been in the area since the early 1990s.

Appendix D

REQUEST TO INSPECT PUBLIC RECORDS

Date: 12/27/2023

To: **Crystal Martinez Hornberger**
Records Custodian
City of Bloomfield
915 N. First St.
PO Box 1839
Bloomfield, N.M. 87413

From: Kate Pickford
Animas Environmental Services, LLC
P.O. Box 8
Farmington, NM 87499

I would like to inspect and copy the following documents:
(List records with reasonable particularity)

AES respectfully requests information that you may have regarding hazardous materials responses; existence of prior and/or current aboveground (AST) or underground storage tank (UST) sites; any current or past leaking storage tank (LUST) sites, prior and/or current hazardous materials storage activities; unauthorized release of petroleum hydrocarbons and/or the current or past existence of other hazardous materials that may affect soil or groundwater quality, or might otherwise be considered an environmental concern at the ROW of Bergin Lane between US Hwy 64 and Blanco Blvd.

If your agency does not maintain these public records, please let me know who does, and include the proper custodian's name and address.

I promise to pay 25 cents per page for copying charges. If the copying charges will exceed $**, please call me to discuss. I understand that I may be asked to pay the fee for copies in advance before you make any copies.
**Paper copies are not requested. Please send electronic records to kpickford@animasenvironmental.com
Please provide a receipt indicating the copying charge for each document.
Thank you for your prompt attention to this matter.

Name: Kate Pickford Signature: Kate Pickford

Address: kpickford@animasenvironmental.com

NEW MEXICO ENVIRONMENT DEPARTMENT
INSPECTION OF PUBLIC RECORDS REQUEST FORM

Please fill out the following information:

1. Date: 12/27/2023

2. Requestor's Name: Kate Pickford

3. Requestor's Address: P.O. Box 8
Farmington, NM 87499

4. Phone No.: (505) 564-2281

5. Email: kpickford@animasenvironmental.com

6. Company Being Represented (if applicable): Animas Environmental Services, LLC

7. Address: Project corridor is ROW of Bergin Lane in Bloomfield, NM between US Hwy 64 and Blanco Blvd.

8. Document or File being requested to be reviewed or copied (please describe the records in sufficient detail to enable Department personnel to reasonably identify & locate the records:
AES respectfully requests information that you may have regarding hazardous materials responses; existence of prior and/or current aboveground (AST) or underground storage tank (UST) sites; any current or past leaking storage tank (LUST) sites, prior and/or current hazardous materials storage activities; unauthorized release of petroleum hydrocarbons and/or the current or past existence of other hazardous materials that may affect soil or groundwater quality, or might otherwise be considered an environmental concern in the ROW of Bergin Lane in Bloomfield between US Hwy 64 and Blanco Blvd.

The cost for copying by NMED is as indicated on Attachment A. Please send this request to:

Inspection of Public Records Officer
1190 St. Francis Drive, Ste. N-4050
Santa Fe, New Mexico 87505
fax: (505) 827-1628 or
email:
environment.records@env.nm.gov

ATTACHMENT A

A. Copies of Paper Records: The Public Records Custodian may charge reasonable fees for copying public records, payable in advance, and, upon request, shall provide a receipt. NMSA 1978, § 14-2-9 (B). Unless a different fee is otherwise prescribed by law or regulation, the following fees apply to producing copies of paper records and scanning paper records to create pdf files for electronic delivery.

(1) 8 ½ x 11"- $0.25 per page
(2) 8 ½ x 14" (1 to 99 copies) - $0.30 per page
(3) 8 ½ x 14" (100 to 499 copies) - $0.60 per page in excess of 99
(4) 8 ½ x 14" (500 or more copies) - $1.00 per page in excess of 499
(5) 11" x 17" (1 to 99 copies) - $0.35 per page
(6) 11" x 17" (100 to 499 copies) - $0.70 per page in excess of 99
(7) 11" x 17" (500 or more copies) - $1.00 per page in excess of 499

B. Audio tape or digital recording reproduction: $2.00 per tape or digital recording if copied by the Department; if the Department does not have the capability to copy the tape or digital recording with reasonable audio quality, the Department may charge the cost required to have the tape copied by an outside service.

C. Printed Copies of Records from Department Electronic Information Systems: Information contained in an electronic information system shall be disclosed in printed or typed format upon payment of a reasonable fee. NMSA 1978, § 14-3-15.1(A). If an Inspection of Public Records Act request requires searching, manipulating, retrieving or reviewing data from an electronic information system, a fee shall be charged for the service. NMSA 1978, § 14-3-15.1(F).

1. For requests resulting in less than 100 pages of records, the Department's reasonable fee shall be the copy cost set forth in Section IX.A. If the Department receives multiple requests from the same or related requestors, the Department may aggregate the requests and charge a fee under Section IX.C.2.

2. For requests of 100 or more pages of records, a reasonable fee shall be the actual staff salary multiplied by the staff time taken to complete the request plus the copy cost set forth in Section IX.A. For requests of 100 pages or more from information systems databases, the Department shall provide an estimate to the requestor and may require a down payment of the estimate before beginning to retrieve records. The Department may charge additional down payments as documents are retrieved and produced.

D. Electronic Format of Electronic Information: If an Inspection of Public Records Act request requires searching, manipulating, retrieving or reviewing data from an electronic information system, a fee shall be charged for the service. NMSA 1978, § 14-3-15.1(F). The fee to produce information in electronic format is the actual staff salary multiplied by the staff time taken to complete the request.

E. Prints from digital images: 5” x 7” or 8” x 10” - $15.00 (ea.).

ATTACHMENT B

New Mexico Environment Department
Release of Public Information in Electronic Format

In accordance with the Public Records Act, NMSA 1978, Section 14-3-15.1(C), any person requesting a public record from the New Mexico Environment Department in any electronic medium (e.g., spreadsheets, GIS layers, database extracts) or database agrees:

1. not to make unauthorized copies;
2. not to use the electronic information for any political or commercial purpose unless the purpose and use is approved in writing by the New Mexico Environment Department;
3. not to use the electronic information for solicitation or advertisement when it contains the name, address or telephone number of any person, unless such use is otherwise specifically authorized by law;
4. not to allow access to the electronic information by any other person unless the use is approved in writing by the New Mexico Environment Department; and
5. to pay a royalty or other consideration to the state of New Mexico as may be agreed upon by the New Mexico Environment Department.

If information contained in the electronic format is searched, manipulated, or retrieved or if an electronic copy is made for any private or nonpublic use, a fee shall be charged by the New Mexico Environment Department. NMSA 1978, § 14-3-15.1(F).

Except as authorized by law or rule of the State Commission of Public Records, any person who reveals to any unauthorized personal information contained in a computer database or who uses or permits the unauthorized use or access to any computer database is guilty of a misdemeanor, and upon conviction the court shall sentence that person to jail for a definite term not to exceed one year or to payment of a fine not to exceed five thousand dollars ($5,000) or both. That person shall not be employed by the state for a period of five years after the date of conviction. NMSA 1978, § 14-3-15.1(G).

In order to determine whether the information requested will be used for solicitation, advertisement, political or commercial purpose, please indicate how the information will be used:

Phase I ESA/ISA

I, Kate Pickford (print name), have requested information in electronic format from the New Mexico Environment Department, and have read and certify that I comply with the conditions listed above.

To:ofosu.philip@epa.gov <ofosu.philip@epa.gov>;turner.ladonna@epa.gov <turner.ladonna@epa.gov>

Good morning Phil and Ladonna,
I received your contact information from Beverly Murray of EPA Region 6.
I am a project manager for Animas Environmental Services, LLC in Farmington, NM.
We are doing a Phase I environmental assessment for the City of Bloomfield, NM for a repaving project on N. Bergin Lane, Bloomfield, NM.
The Environmental Database Report we requested for the project area identifies the Cross Refinery on Newby Lane, Bloomfield NM as being within one half mile of the project area we are investigating.
The information about this site is very limited in the SEMS database. I am trying to determine why the site is listed as a Superfund site and whether there are any potential environmental impacts to the project area we are assessing. The only information available on the SEMS website is below.
I appreciate any further information you can provide.
Thanks,

Good afternoon, Kate,

Your attached IPRA request to the New Mexico Environment Department yielded one result for the Voluntary Remediation/Brownfields section of the Groundwater Quality Bureau. The property listed below is located within .5 mile of your requested location and is an active Targeted Brownfields site. Please let me know if you would like additional information about this site.

TBA Site #:	51573134
Property Name:	Bloomfield Aerex Refinery - West
Alias:	N/A
Street Address:	5th & Blanco
City:	Bloomfield
County:	San Juan
State:	NM
Zip Code:	87413
Size (in acres):	6.63
Latitude:	N 36.71717°
Longitude:	E -107.98714°
Site Description:	Vacant lot (Former Refinery)
Nature of Contamination:	Petroleum products
Project History?:	Null

You may receive additional information from other NMED programs that meet your request.

Sincerely,

Genevieve Morgan
Project Manager

Dear Kate Pickford,

Many of the Petroleum Storage Tank Bureau's (PSTB) records are available on our website. The PSTB public resources have information on whether there is a PSTB-regulated facility or release/leak associated with the address, the total number of tanks, how many tanks were removed, and how many are in use. Moreover, the documents such as tank closure reports, soil sampling reports, groundwater monitoring reports, inspection reports, NFA letters, etc., are usually uploaded to our online resources, and you may access them independently.

To facilitate and expedite the PSTB's response, please review the attached instructions, and identify any facility associated with the subject property. Please provide me the facility ID number you find and let me know what records you need are not linked to our map (GoNM). Also, please contact me if you need assistance using our online resources or have any questions about your findings. Thank you.

Good afternoon Kate -

In response to your request for information regarding a Phase I Environmental Site Assessment for a property located at ROW of Bergin Lane in Bloomfield, NM between US Highway 64, and Blanco Boulevard.
(Please see attached request)

The NMED Hazardous Waste Bureau does not have data, records or files of information based on the information you provided. The coordinates were processed through RCRA Info, and no information uploaded for the property mentioned above.

However, the NMED Hazardous Waste Bureau has provided a link below to all spills/complaints reported to the Bureau.

https://www.env.nm.gov/hazardous-waste/environmental-notification-reporting/

Other NMED Bureaus that have received this request will respond accordingly if they have records responsive to your request.

If you have any further questions or require further information, please do not hesitate to contact me. Thank you and have a nice afternoon!

Re: Request to Inspect Public Records

Dear Kate Pickford:

On December 27, 2023, this office received your request for public records. You request records pertaining to: A Phase I Environmental Site Assessment for a property located at ROW of Bergin Lane in Bloomfield, NM between US Highway 64 and Blanco Boulevard (See attached request).

I forwarded your request to the bureaus on December 28, 2023. The bureau(s) will respond by January 11, 2024.

Should you have any questions, please contact the Petroleum Storage Tank Bureau at (505) 476-4377, the Solid Waste Bureau at (505) 699-8779, the Hazardous Waste Bureau at (505) 476-6035, and the Ground Water Quality Bureau at (505) 827-2751.

Sincerely,

/S/ Christina Espinoza

animas environmental services

Ms. Pickford is a Project Manager at Animas Environmental Services, LLC (AES). She works for AES' diverse client base and provides technical expertise on remediation, reclamation, regulations, surface, groundwater, and potable water quality, stormwater management, and watershed health. Ms. Pickford works with federal, state, tribal, municipal, and local clients as well as a wide range of private sector clients, ranging from small independent companies to major oil and gas producers.

Prior to joining AES, Ms. Pickford provided environmental emergency response services to USEPA Regions 8 as a Hydrogeologist and first responder on the Superfund Technical Assessment and Response Team (START) contract.

Ms. Pickford has also worked on a variety of natural resource management and water projects, including but not limited to:

- Enforcement of the Colorado Mined Land Reclamation Act for hard rock and construction materials
- Review of groundwater impacts at dewatered construction materials sites throughout Colorado
- Assessment and characterization Red Arrow Mine and Mill Mancos, CO (mercury contamination)
- Assessment and characterization of the abandoned Stringtown Lab, Leadville, CO (various explosive, flammable, and unstable chemicals)
- Enforcement of the New Mexico Oil and Gas Act
- Prepared nomenclature for hearing on all oil and gas pools in the San Juan Basin, New Mexico
- Committee member and participant in rewriting the New Mexico Horizontal Well Rule

Kate Pickford

animas environmental services

Ms. McNally is one of the original principals and is now sole owner of Animas Environmental Services, LLC (AES). She has 25 years of experience in environmental consulting, and prior to that, she worked as an archaeologist in the Four Corners area. Her work includes oversight of environmental components of local government infrastructure improvement projects; site investigations, conceptual site models, and corrective action plans; development of remedial system design and specifications for petroleum contaminated soil and groundwater; development and review of Spill Prevention Control and Countermeasure (SPCC) Plans; project review of Phase I/Phase II Environmental Site Assessments (ESAs) and NPDES multi-sector general permits (MSGPs) for industrial, construction and municipal activities; and Environmental Assessments. Ms. McNally has had extensive interaction with municipal, tribal, state, and Federal regulatory agencies and records. Current and current relevant projects overseen by Ms. McNally include:

NMDOT Historic Route 66 through Gallup, New Mexico
The project consists of a Phase I Environmental Site Assessment (ESA)/Initial Site Assessment and surveys for asbestos-containing building materials (ACBM) and lead-based paint (LBP) for a 16-mile linear corridor project along Historic US 66 through Gallup, New Mexico, as part of preliminary planning and design phase of highway improvements. It is anticipated that work will extend to Phase II/Preliminary Site Investigation activities and include soil boring and monitor well installation along US 66 for investigation of petroleum hydrocarbon and chlorinated solvent contaminants.

Bureau of Indian Affairs – Historic Tuba City Motors, Former Steam Plant, and BIA Roads Maintenance Facility, Tuba City, Arizona
This project consists of hazardous materials assessment and remediation activities at three adjoining sites in Tuba City, Arizona, including delineation and removal of ACBM and ongoing remediation of soil and groundwater impacted by heating oil, diesel fuel and gasoline in a commingled plume.

Balfour Beatty Campus Solutions, LLC – Campus Housing Phase I Environmental Site Assessment and Phase II Site Investigation, San Juan College, Farmington, New Mexico; 2018
AES completed a Phase I ESA as part of planning and design of campus housing. A Phase II Site Investigation was also completed to the delineate the extents of petroleum hydrocarbon and per- and polyfluoralkyl substances (PFAS) impacts in soils.

Serving on the City of Farmington's Metropolitan Redevelopment Area (MRA) Commission, where she assisted the City in preparing a USEPA Brownfields Grant Application ($800,000) for renewal and economic development of a large brownfields parcel adjacent to the Animas River and south of the Farmington's historic downtown, 2018-current.
